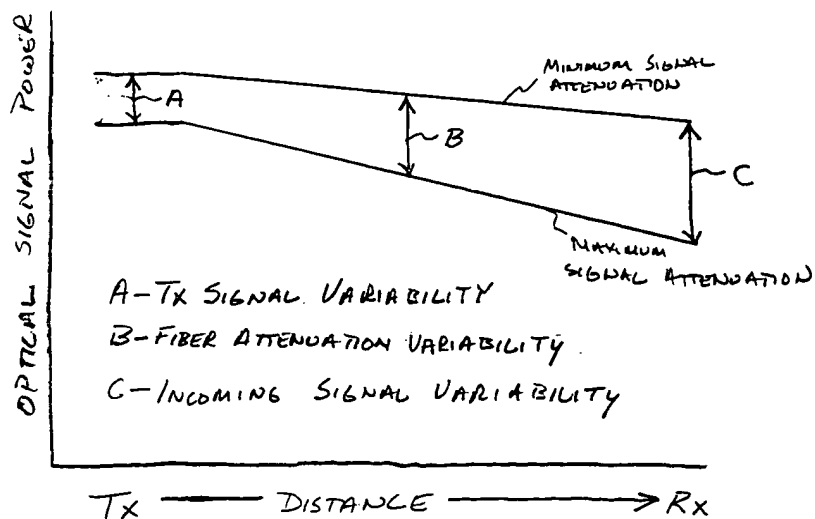

FIG. 2

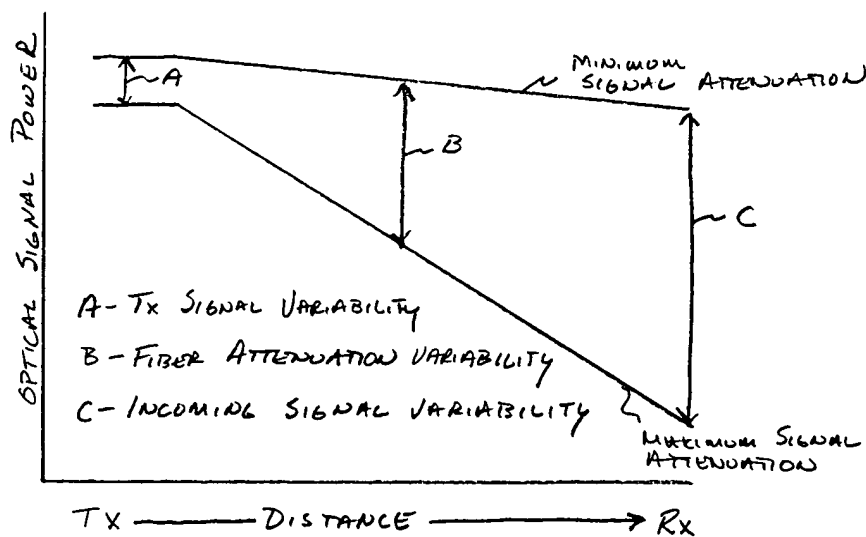

FIG. 3

Hand-drawn schematic diagram of a multi-channel system 400. The system consists of two main blocks, 410 and 420, connected by a network of lines. Block 410 has multiple inputs labeled 404 and 408, and a control input labeled Tx_DISABLE. Block 420 has multiple outputs labeled 414 and 418, and a control input labeled Los. A central network of lines, labeled 402 and 430, connects the two blocks. There are also labels 406 and 430 near the connection points.
